

I am writing your organization to prevent Low Power FM translating service from taking precedence over the current FM Translator service. K-Love has benefited the community in many ways, by being a positive source for music and news for my friends. I have donated to K-LOVE for years, and changing its ability to hear it will forfeit me of its benefit. I'm an active donor to this service, as are many of my friends. If this radio station could no longer be heard, it would deprive us of our most listened to station, as well as infuriating all who have donated to it to keep it's broadcasts heard.

K-LOVE serves the public interests, as it is the only station of it's kind in the city. There simply are no duplicates. For contemporary family-focused programming, the public needs and deserves this kind of programming.
